

Industrial Performance Friction Feeder Family

350ip3 Open Frame Discharge

High Performance - Reliable - Cost Effective

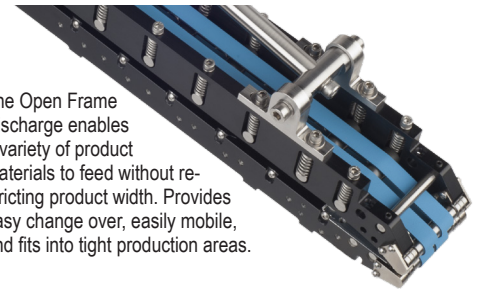

1 3-Piece Shaft allowing for easy belt changeover

The ip3 feeders have hardened stainless steel shafts and sealed bearings providing maximum life expectancy and 24-hour a day operation.

2 Open-Frame Design with long reach

The Open Frame Discharge enables a variety of product materials to feed without restricting product width. Provides easy change over, easily mobile, and fits into tight production areas.

Common examples how products feed in a Open Frame Discharge

CE 350ip3 Open Frame Discharge feeder shown with long discharge)

Features

- MFT's Open Frame Discharge enables the feeder to have a long reach onto a conveyor and into tight production areas.
- With no fixed sides on the discharge, the open frame design can handle many different sizes and irregular products. Some examples are tipping for CR80 cards, mailing cards and pharmaceutical inserts
- Open frame discharge design does not require belt adjustments for simple changeovers.

Industries:

- Pharmaceutical
- Food
- Cosmetics
- Packaging
- Financial
- Printing
- Robotics

Applications

- Tipping over a folder gluer.
- Inserting products into areas with minimum clearance
- Ideal for handling products with short lengths.

Technical Data: 350ip3 Open Frame Discharge

Equipment Specifications

Typical Height	698mm (27")
Typical Length (ED)	1283mm (51")
Typical Width	641mm (25")
Maximum Belt Speed	140 Meters per Minute*
Power Requirements	110/220V 50-60Hz 6A
Operating Temp.	10°-35°C (50°-95°F)
Weight Ranges	75-125 lbs.
Operating Humidity	30-100 Non-Condensing

Product Specifications

Minimum Size	25mm† (W) x 25mm (L)
Maximum Size*	300mm (W) x 325mm (L)‡
Minimum Thickness	0.075mm (.003")

† Minimum Product Length may require narrow belt configuration.

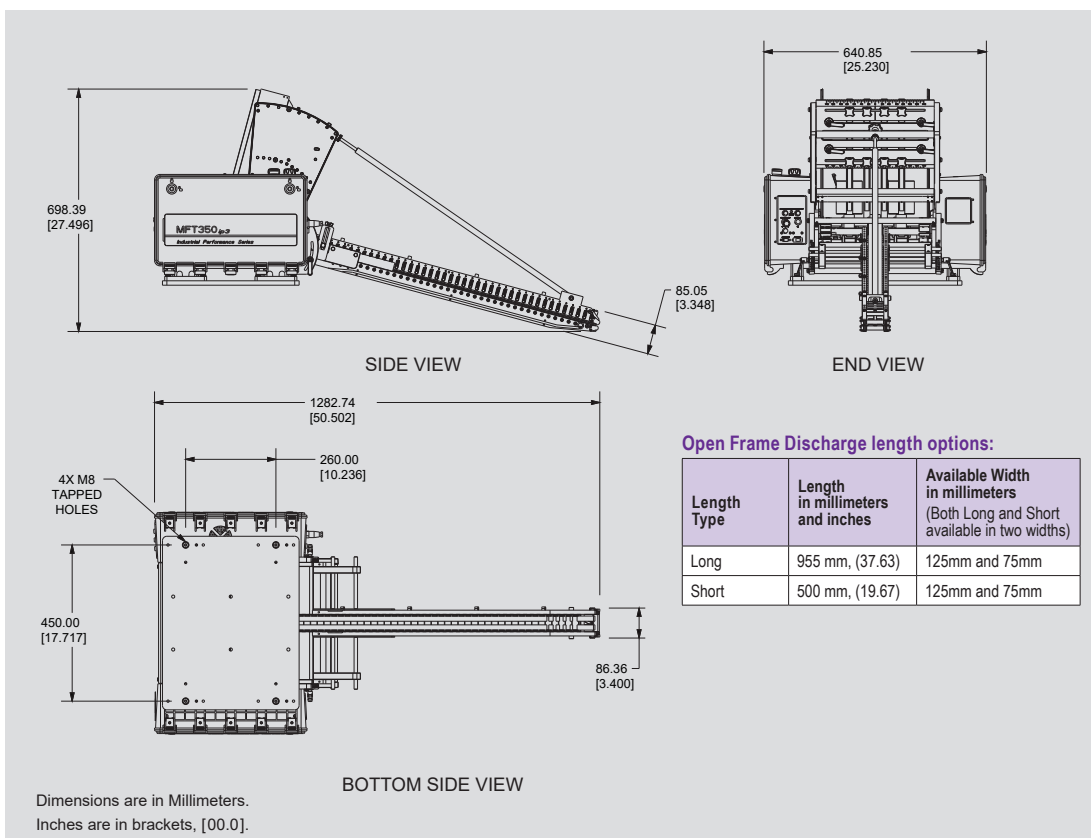

‡ Maximum Product Length is dependent on product, equipment configuration and application.

*All MFT Automation® equipment can be designed to meet your specific production requirements. Please contact one of our experienced Application Engineers to discuss many solution options available to you.

Product examples to deliver through feeder:

- Pamphlets
- Card Stock Products
- Gift Cards
- Coupons
- Clear-Film Plastics
- Magnets
- Carton Blanks
- Tyvek® Sheets
- Pharma Inserts
- And More

All specifications are subject to change without notice.

Technical Support Services

Our dedicated team of experienced Technicians and Application Engineers have the proper training and necessary credentials to answer any questions and offer system solution recommendations for your project needs.

For Technical Assistance, call 651-407-3100, select option 2.

MFT Automation provides high performance friction feeding and labeling solutions throughout the world. With state-of-the-art control technology and robust mechanics, our products feed more quickly and accurately to provide customers with a greater value of return. All feeders, labelers and accessories can easily be integrated with other machines to provide a total system solution for any application.
