HIGH PERFORMANCE AUTOMATION SOLUTIONS

**Pharmaceutical,
Food,
Print & Packaging
Solutions**

Pharmaceutical Industry

The pharmaceutical industry is a dynamic industry with constant breakthroughs in technology. Companies must adapt quickly to meet new government mandated regulations. With increased pressure to produce more product at lower costs, yet not sacrifice quality, it is now more important than ever to purchase the right system. Many suppliers are using outdated equipment which can be costly and unreliable. The solution to these problems is updated automation. Newer technology can provide increased efficiency, throughput, cost savings and improved safety.

Tyvek® pouches with barcodes

Track & Trace Serialization Line

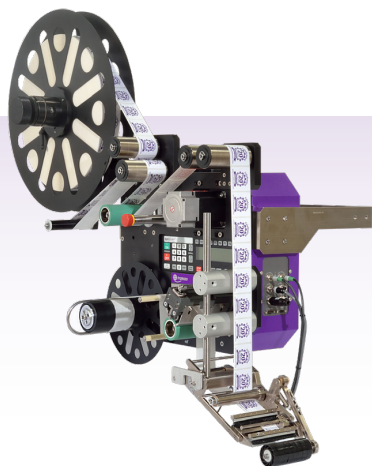

The Track & Trace offers turnkey product handling for serialization coding/printing, inspection and reject system providing a trackable data file. An infrared sensor allows for accurate count using double-detect and overlap detection. This system is equipped with a highly adaptable software package that ensures for flexible and precise controls.

Family of Feeders, Labelers, and Systems

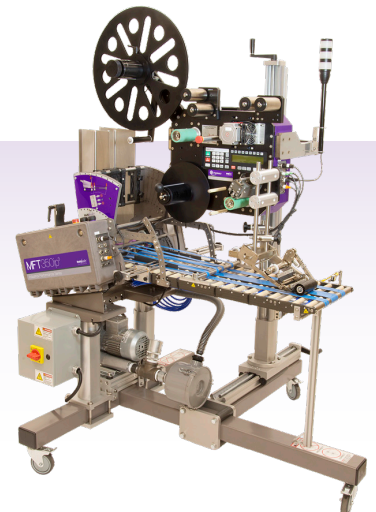

Multifeeder 350 ip³ Feeder

Impresso™ Labeler Applicator

Impresso™ Labeler Feeder System

MFT Automation:

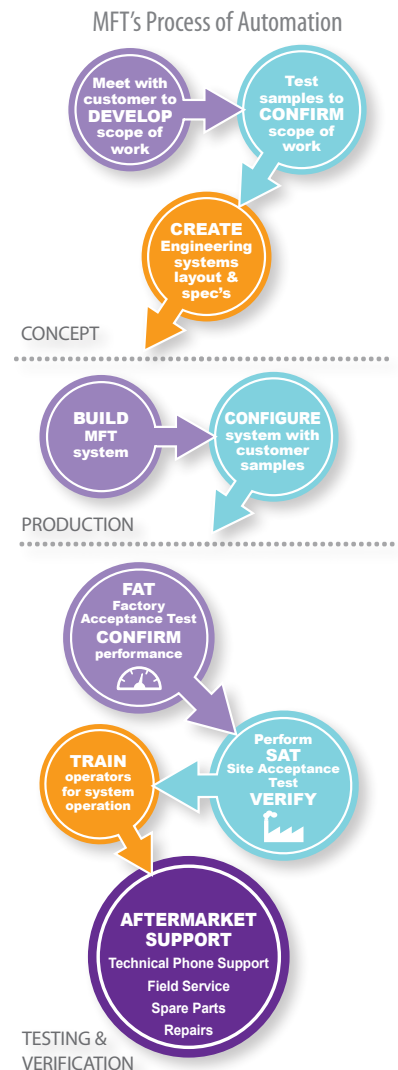

A leader in automation solutions for the pharmaceutical, food, and print/packaging industries.

MFT Automation provides high performance friction feeding and labeling solutions globally throughout the world. With state-of-the-art control technology and robust mechanics, our products feed more quickly and accurately to provide customers with a greater value of return. All feeders, labelers, and accessories can easily be integrated with other machines to provide a total system solution for any application.

We believe in creating a better quality of life through innovation & automation.

Process of Automation - Providing value

MFT's process is engineering oriented and customer driven. We have a methodical design approach that delivers solutions for any application. We work with you to understand your machine specifications and develop a reliable solution. From our first meeting discussing your project, to its final testing and delivery of your machine, we are committed to providing you with the highest customer support and best quality product.

MFT Automation equipment that meets pharmaceutical, food, and print/packaging requirements include:

All of our feeders are designed for high performance and can be further upgraded.

- ip³ - Standard
- ip³ with Hard Carcass Belts
- Washdown (non-hygienic)
- Hygienic Washdown

Our labelers are accurate, reliable and efficient as a standalone or integrated to a complete system.

- 1-piece labeler, Impresso
- 2-piece labeler, 102hsm
- 3-piece labeler, 103hsm
- Hygienic Washdown Labeler

We can find the right system combination to meet your production needs.

- Conveyors
- Drop Tables
- Product Loaders
- Stands

Contact a sales representative for your specific feeding or labeling needs.

Automation provides increased efficiency, throughput, cost savings and improved safety.

Food Industry

Clean-in-Place Design, Hygienic Washdown Feeder 300 and 600

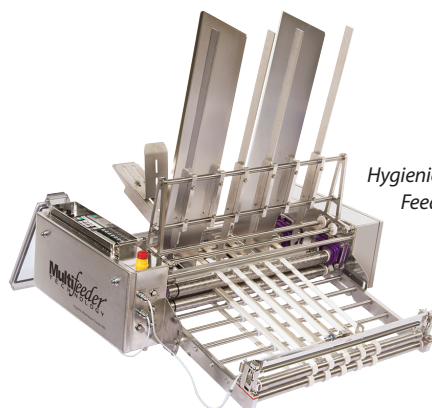

MFT's Washdown components are certified as IP66 or better to ensure consistent Clean-in-Place wash-down performance. The Hygienic Washdown Feeder 300 and 600 meets NEMA4X standards for indoor and outdoor protection from hazardous parts, solid foreign objects, water, rain, sleet, ice, snow and corrosion.

Clean-in-Place key features are:

- Minimal contamination points
 - Less downtime for disassembling and reassembling.
- Minimal disassembly
 - Less risk of cross-contamination with Listeria type bacteria.
 - Minimize liability.
- Easy cleaning and maintenance
 - Built with type 304 passivated stainless steel for moisture and corrosion resistance.
 - FDA approved feed belts that meet sanitation requirements.

"Sanitation is the top priority with safety teams involved in machine specifications requiring ip69 washdown".

Labeler 300

Hygienic Washdown Labeler 300

The Hygienic Labeler 300 is a robust machine designed for precision placement labeling, and built for harsh environmental conditions. This labeler meets IP69K requirements to ensure consistent washdown performance.

Our Washdown machines are designed for a variety of food products such as:

- Frozen food packaging.
- Pizza trays.
- Tyvek®, wax papers, slip sheets and more.

MFT Automation has over 20 years of experience in the design and construction of high performance automation solutions.

Print/Packaging Industry

The print/packaging industry has primarily shifted to digital printing. The need for “updated automation” is necessary to be more efficient and cost effective. Similar to other industries, investing in new equipment now is necessary to avoid high costs of outdated systems. MFT’s friction feeding machines are the gold standard for industrial, printing and packaging challenges. Our machines are working 24/7 in all parts of the globe for many different types of industrial production lines. MFT has the solution to increase production with automation.

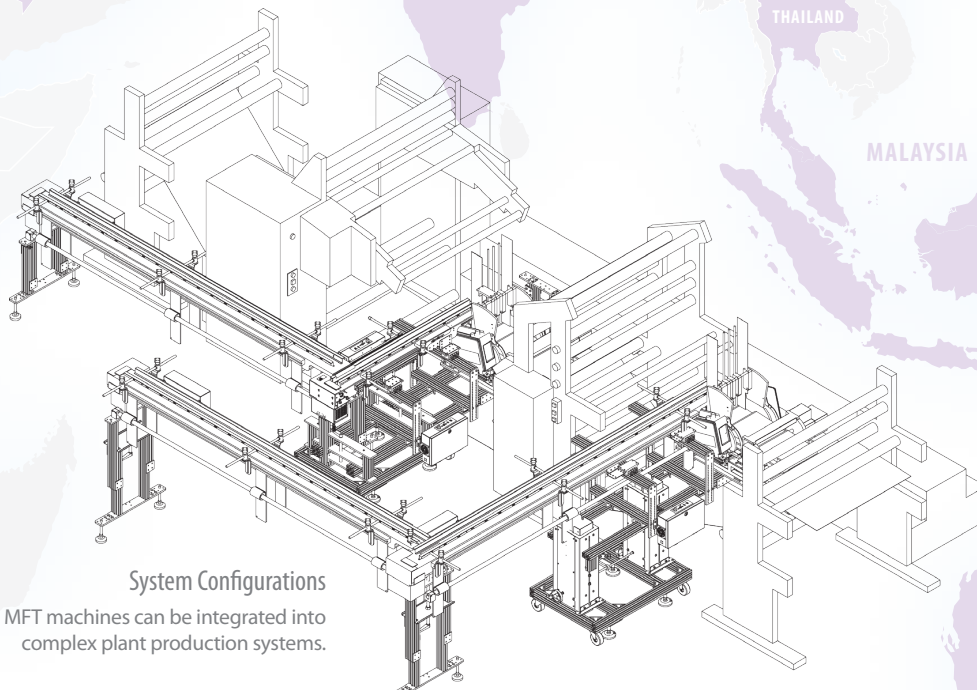

350ip³ Friction Feeder

The industrial performance series, ip3, is the top choice for nearly any application. The 350 ip3 is designed with high quality parts which allows for constant, reliable production and the ability to take on demanding applications. This system can be standalone or easily integrated into a production system. It is often the perfect solution for a print/packaging production line.

System Configurations

MFT machines can be integrated into complex plant production systems.

Aftermarket Offerings

*MFT has a dedicated aftermarket support team to help you with your system.
Support includes:*

TECHNICAL PHONE SUPPORT:

Give us a call and we can help troubleshoot your MFT system and supply any needed technical documentation.

FIELD SERVICE SUPPORT:

We can visit you on-site to assist with training, installation, and/or troubleshooting.

WARRANTY AND NON-WARRANTY REPAIRS:

If you have challenges with your MFT system, contact us, and send in your system for evaluation. At our facility, we will run diagnostics and provide you with a repair quote or alternative solution.

*Contact a sales representative for a system solution recommendation or any product questions.
Call 651-407-3100, select option 2, or email us at customerservice@multifeeder.com*

Demo video support

On our website menu click, "Send A Sample" to take advantage of our free demo video service. By sending your samples we will demonstrate how we can meet your system requirements; identify and mitigate any unexpected challenges.
